

# Keeping a Family History

In 3 Nephi 23, the Savior asks to read the Nephite records. He notices that the prophecies of Samuel the Lamanite, as well as a description of how they were fulfilled, are missing from the writings. He asks the Nephites to add those events to the records. This story reminds us how important it is to keep a journal and a family history, so our posterity can have a knowledge of it. Print off the following sheets and fill them in to start recording your family history.
